Licking County’s Forest Economy

Eric McConnell, PhD
Forest Operations and Products Specialist
Ohio State University Extension

Ted Wiseman
Agriculture and Natural Resources
Ohio State University Extension, Licking County

Licking County contains 682 square miles (436,800 acres) of land and is home to 167,500 citizens. There are 214 industries in the county, with the median household earning an income of $54,700. Major employers include businesses in the sectors of food services, state and local governments, real estate, nursing and residential care, and wholesale trade.

The land resources of Licking County provide many economic benefits. The county’s 1,400 agricultural farms produce agronomic crops and poultry, among others. An abundance of wooded acres are also present, providing community support to the county’s forest industries. These businesses generate $154 million in industrial output and $10.2 million in taxes.

Some of the many contributions Licking County’s forests and forest industries provide to the local economy are illustrated in this fact sheet using key figures and statistics. The figures describing Licking County’s forest resources were constructed using data from the 2011 forest survey database provided by the United States Forest Service’s Forest Inventory and Analysis. Those explaining the county’s forest industries were developed from data analyzed using IMPLAN®. Table 1 summarizes the IMPLAN® model for Licking County’s economy.

Benefits of Woodland Management

- Properly managing your woodland improves forest health, aesthetics, and wildlife habitat. It also provides soil stabilization, clean water, self-satisfaction, and a potential source of income.
- Managing timber requires less long-term inputs compared to many other land uses.
- You are often able to obtain cost share funds to establish your woodland, property tax credits while managing your forest property, and preferable tax treatment at harvest.
- Standing timber is a stable form of wealth, often comparable in performance to mutual fund investments.

For more information regarding IMPLAN® and the economic impact analyses for Licking County, please contact the first author in the School of Environment and Natural Resources.
How Can I Learn to Better Manage My Woodland?

- Become actively involved in the stewardship of your property.
- Join your local forestry association.
- Search Ohio State University Extension’s website Ohioline (http://ohioline.osu.edu/for-fact/index.html) for further study of forestry related topics.
- Contact your local service forester at the Ohio Division of Forestry to help you develop a management plan for your property.
- Obtain soils information from your local Soil and Water Conservation District.
- Enlist the assistance of a professional forester when planning a timber sale.
- Consider hiring an Ohio Master Logging Company to conduct your harvesting operation.

Terminology

Acre: A unit of land measure equal to 43,560 square feet (208.7 feet × 208.7 feet). One square mile equals 640 acres.

Direct Economic Impact: The effect generated by the industry of interest in an economic impact analysis. This is measured through employment, value-added, and industrial output produced to meet demand for the manufactured product(s).

Direct Federal Tax Impact: Taxes collected by the United States government. These taxes are generated from labor income, indirect business taxes, households, and corporations associated with the industry of interest.

Direct State and Local Tax Impact: Taxes paid to state, county, and municipal governments. These taxes are generated from labor income, indirect business taxes, households, and corporations associated with the industry of interest.

Employment: The total wage and salary and self-employed jobs in a geographical area.

Indirect Business Taxes: Sales and excise taxes paid by individuals to businesses through normal operations. They do not include taxes on corporate profits and dividends.

Industrial Output: The total value of production measured as the sum of value-added plus the cost of buying goods and services to produce the product(s).

Labor Income: Wages and benefits paid to employees plus proprietary income for self-employed work.

Sawtimber Volume: Net volume in board feet by the International 1/4-inch rule of sawlogs in sawtimber trees on timberland. Gross volume minus the deductions that affect use for lumber equals net volume.

Value-Added: The sum of labor income, interest, profits, and indirect business taxes.
Table 1. Direct industrial contributions within Licking County's economy, 2010. The IMPLAN® model’s 440 sectors were aggregated into 12 industries by each sector’s 2-digit North American Industry Classification System (NAICS) code number. A (----) indicates less than five employees or a value less than $500,000 to prevent potential disclosure of individual company information.
